Re: Bedford Recycling; Registration No. R093-33554-00038

Dear Commissioner:

This letter serves as notification of modifications to an air emissions source located at Bedford Recycling, 904 Summit Lane, Bedford, Indiana 47421.

The affected emissions source is P001, a vehicle and sheet metal shredder constructed in 1979 with a nominal capacity of 20 tons per hour using a water injection system for fire/explosion suppression, exhausting to the atmosphere.

Modifications under construction for the unit include replacement of the old shredder box and rotor with a new shredder box and rotor manufactured by Wendt Corporation. The design capacity of the shredder will not be affected. Construction began the week of September 8, 2014.

Bedford Recycling intends to continue operation in accordance with its air emissions authorization, Registration No. R093-33554-00038.

Attached is a letter from Wendt Corp indicating the modifications do not affect the mill processing capacity.

If you have any questions, please contact me.

Yours very truly,

Industrial Environmental Consultants, LLC

Graham P. McRedmond

Re: New Mill Capacity

Dear Mr. Parsons,

The capacity of your shredder has not changed by replacing your old shredder box and rotor with our new WENDT shredder box and rotor.

Sincerely,

Joseph Nuchereno, PMP
